By signing this *CHEST* Author Agreement ("Agreement"), each and every undersigned author (each, "Author") of the below-referenced manuscript (the "Manuscript") represents, warrants and agrees as follows:

- 1) I have participated sufficiently in the research and analysis of data, as well as the writing of the Manuscript, to take public responsibility for the Manuscript and to qualify as an "author" under *CHEST*'s policies (available at [www.chestjournal.org/misc/policies.shtml](http://www.chestjournal.org/misc/policies.shtml) and referred to as the "*CHEST* Policies").
- 2) All content included in the Manuscript is original and does not infringe the intellectual property rights or violate any other rights of others, including but not limited to, their rights under laws of contract, confidentiality, privacy, libel, slander and defamation. If the Manuscript includes third party tables, graphs or other content, I have obtained written consent to use such materials. The third party consents will support print and on-line publication in *CHEST*, publication of supplements, translation into other languages, and other derivative uses and worldwide distribution of the Manuscript.
- 3) No portion of the Manuscript has been published previously or is under consideration for publication elsewhere. I have disclosed to *CHEST* any and all published articles or other manuscripts in preparation or submitted elsewhere that are related to the Manuscript. I have not and will not report scientific information described in the Manuscript to public media, governmental agencies, or drug manufacturers.
- 4) I have disclosed all outside editorial assistance and the financial source of such assistance.
- 5) I have disclosed all actual and potential conflicts of interest in accordance with the *CHEST* Policies. I agree to disclose any additional conflicts of interest that might arise between the time of my signing this Agreement and publication of the Manuscript in *CHEST*.
- 6) To the best of my knowledge after due diligence, I have fully reported all data and events, including adverse events and changes to the protocol, that are relevant and material to the study results and/or other content of the Manuscript. I agree to submit any new, relevant data or information that might become available between the time of my signing this Agreement and publication of the Manuscript in *CHEST*.
- 7) I have read and understand all of the *CHEST* Policies. I have complied, and will comply, with the *CHEST* Policies, including the requirement to follow the highest ethical standards. I acknowledge that *CHEST* relies on my disclosures and may discipline me for any misconduct, in accordance with the procedures outlined in the *CHEST* Policies.
- 8) I hereby assign to The American College of *CHEST* Physicians ("ACCP"), which is the owner of *CHEST*, all of my rights, title and interest in and to the Manuscript. This assignment will occur automatically, without notice or further action, upon acceptance of the Manuscript for publication in *CHEST*. ACCP's rights in the Manuscript will be full and unlimited, and I disclaim all rights whatsoever. Notwithstanding the foregoing, if I am a federal employee, I will retain copyright in the Manuscript, and I have indicated this in *CHEST* Manuscript Central.
- 9) The Manuscript, all information provided in *CHEST* Manuscript Central, and all information accompanying the submission are true and complete in all respects, and comply with *CHEST*'s Author Instructions.

10) I will indemnify and hold harmless ACCP, *CHEST's* Editor in Chief, staff, editors and peer reviewers, and all of ACCP's officers, regents, agents and employees, from and against any and all liabilities, damages, claims, causes of action, suits, proceedings, demands, costs and expenses (including reasonable attorneys' fees and expenses) asserted against or incurred by any of them in connection with any allegation of breach, or actual breach, of my representations, warranties or obligations under this Agreement. I acknowledge and agree that my liability is joint and several with the other Authors of the Manuscript, which means that I can be held accountable and liable for breaches of this Agreement by co-Authors, regardless of fault, or lack of fault, on my part.
